SUBJECT: FY14 Offender Profile

Please find attached a copy of the FY 2014 Offender Profile. The Offender Profile is a collection of important statistics about the offenders supervised by the Missouri Department of Corrections, both incarcerated and on field supervision. The work of the Department is ever challenging and the intention of this statistical abstract is to answer many of the questions that the public, the legislature and Department's own staff often ask about regarding the offenders supervised by the Department. In FY 2014 the Department admitted over 20,000 offenders to prison and 41,000 offenders began a new probation or parole. Every day in FY 2014 the Department supervised over 96,000 offenders.

There is one statistic in which I continue to take particular pride and that is the decline since 2005 in recidivism. In fact, the recidivism rates are now lower than at any time since the mid-1980s. The Department attributes the decline to the efforts of the collaborative Missouri Reentry Initiative and to the continuing efforts of the Division of Probation and Parole to improve evidence based supervision. Rehabilitation means providing programs, both in the institutions and in the community, that help address the problems that many offenders face: substance abuse, mental illness, lack of education and employment skills.

In FY2014 the Justice Reinvestment Act (HB1525) continued to positively impact the offender population. Many probationers and parolees with nonviolent offenses have been able to advance their discharge date by maintaining good behavior. At the time of writing, the number of offenders on supervision has been reduced by over 10,000 and over 30,000 offenders have been discharged after earning earned compliance credits.

I hope you find the Offender Profile useful. Comments about improving the Offender Profile are always appreciated.

On September 1, 2012 offenders on probation and parole were able to earn compliance credits by maintaining good behavior and, thereby, reduce the time to the discharge of their sentence (HB1525). Since September 2012 the supervised population has declined by 8,814 largely as a result of offenders earning compliance credits and achieving an early discharge from supervision.

Note: With each new issue of July 1 estimates, the census revise estimates for years back to the last census. Previously published estimates are superseded and archived. Offender populations exclude Out of State Offenders.

- Offenders with new felony sentences received by the DOC in FY14 for probation or prison, excludes revocations.

Missouri County Felony Sentencing Rates for FY2014

The Difference between Incarceration Rates and Felony Sentencing Rates

Incarceration rates count the number of offenders incarcerated for a felony offense on a particular day. Felony sentencing rates count the number of offenders sentenced to probation or prison for a new felony offense in a year. The incarceration rate includes offenders revoked from probation or parole and the rate is also influenced by the time offenders are incarcerated.

Of offenders incarcerated on June 30, 2014, 23.1% were between 20 and 24 years of age at the time of commitment, while 10.8% of incarcerated offenders were less than 20 years old at the time of commitment. Commitment age is the age on admission for a new commitment cycle.

Offender Classification

‘Unclassified’ includes recently admitted offenders who have not completed the classification process and offenders sentenced to 120 day programs. 120 day offenders do not receive a full classification upon admission due to the expected short prison stay. There is a statutory requirement for the offenders to be released within 120 days of admission if they successfully complete the program.

In May 2013 a new classification system was introduced that reduced the number of custody levels from five to three. The offender's custody is still determined by length of sentence and institutional behavior. Offenders with a low risk assessment will be Level I custody if the time to release is less than six years. Offenders with low risk but with six to twelve years to release will be Level II custody (medium) and offenders with more than twelve years to release will be level III (maximum).

A low custody level will be overridden for offenders with poor institutional adjustment, pending charges and sex offenders who have not completed the Missouri Sex Offender Program.

At the time of the snapshot many offenders will not have been classified on the new system. Female offenders are not housed by custody level.

5. Admissions to Prison, FY2005 to FY2014

Prior to July 1, 2008 admissions included offenders who were returned to a Community Release Center, but were not subsequently returned to prison. After July 1, 2008 only offenders returning to prison are included as returns from supervision. The effect of the change in reporting was to reduce the number of admissions. In the last fiscal year prior to the change (FY2008) it was estimated that there were about 700 offenders included in admissions that had been admitted and released from a community release center without being transferred to a mainline prison.

Offenders Received to Serve a Minimum Mandatory Prison Term

Minimum prison terms before parole eligibility where mandated in 1994 for offenders convicted of dangerous felonies (85%) and for offenders with prior incarcerations with the Missouri Department of Corrections. One prior incarceration - 40%, two prior incarcerations - 50%, three or more prior incarcerations - 80%. Offenders with drug offenses do not serve a minimum prison term for prior incarcerations with the DOC.

Average Sentences: New Admissions FY2005 - FY2014

New admissions exclude offenders serving short sentences under 559.115 RSMo or 217.202 RSMo (120 Day and Long Term Drug sentences). Life sentences are computed at 30 years.

* The felony class of the most populous charge code.

The statutory defined offense may include more than one charge code.

Life Sentences and sentences over 30 years are computed at 30 years.

New court commitments include offenders sentenced by the courts to a term commitment. New court commitments do not include offenders sentenced to a 120 day, long term drug program, probation or parole revocations. Offenders convicted of the attempt of the offense are excluded (the offenders are sentenced to one felony class lower.)

The felony class is the current felony class for the offense. Some offenses, including Child Molestation 1st and

Endangering the Welfare of a Child have had the felony class of the offense increased during the analysis period.

DWI (577.010) Includes persistent, aggravated and chronic offenses.

7. Time Served to First Release

Time served as a percent of the sentence in FY 2014 is higher (50.7%) than in FY 2012 (51.7%). Offenders convicted of offenses committed on or after August 28, 1994 have to serve a minimum prison term if they have committed a dangerous felony (85%) or have prior incarcerations with the Missouri Department of Corrections (40% one prior, 50% two priors and 80% three or more prior incarcerations). Time served includes jail time that is credited to an offender's sentence for incarceration prior to receipt by the Department of Corrections. Offenders convicted of a sex offense in Chapter 566 RSMO have to complete the Missouri Sex Offender Program before being eligible for a parole release. Offenders sentenced as a chronic DWI offender have to serve two years before parole eligibility.

First release is the first release following the admission for a new commitment. First releases do not include the release of offenders who were returned as parole violators or from a 120 day program.

8. Recidivism Rates of Institutional Releases

There are many ways to measure recidivism and there are no national standards. The rates calculated by the Missouri Department of Corrections and included in the Offender Profile are for offenders first released in the commitment. These are offenders admitted to prison to serve a new commitment and released to either parole, conditional release or on the discharge of the sentence. Excluded from the calculation is the release of parole violators who have previously been returned to prison for a violation of supervision within the commitment. Recidivism rates that include the release of parole violators are higher than the first release recidivism rates.

The recidivism rates measure two outcomes:

1. The first return to prison following the release (technical violation of supervision or new conviction),
2. The first conviction following the release from prison (the new conviction can be a new prison sentence or probation). Because many offenders returned from parole are returned for a technical violation the new conviction recidivism rate is not a very helpful indicator of new criminal behavior until two or more years from release.

New convictions include findings of guilt (suspended impositions) and deferred sentences (drug courts, DWI courts and mental health courts) that are supervised by the Board of Probation and Parole.

The data for the calculation of the rates are taken from the DOC offender database. Offenses and incarcerations in other states will not be included unless the offender is returned to the custody of the DOC.

Other recidivism rates are given in the Offender Supervision profile for offenders released to probation following a 120-day or long-term drug program and for offenders serving a new court probation. (Section 17)

Since 2005 there has been a decline in the incarceration recidivism rate both for offenders released from prison (page 58) and for offenders starting probation (page 102). The reduction in recidivism has been attributed to the Department's reentry program, improvements in risk assessment for releasing and managing offenders in the field and changes in supervision practices by the division of probation and parole. The changes in supervision practices were intended to reduce the number of offenders being incarcerated for technical violations when the offenders could continue to be safely supervised in the community.

Time Served to First Release

Offenders convicted of offenses committed after August 28, 1994 have to serve a minimum prison term if they have committed a dangerous felony (85%) or have prior incarcerations with the Missouri Department of Corrections (40% one prior, 50% two priors and 80% three or more prior incarcerations). Time served includes jail time that is credited to an offender's sentence for incarceration prior to receipt by the Department of Corrections. Offenders convicted of a sex offense as defined in 589.015 are required to complete the Missouri Sex Offender Program before being eligible for parole. Failure to complete the program requires the offender to serve the completion of sentence in prison.

Execution is an authorized punishment for offenders convicted of Murder 1st degree. Offenders not sentenced to death must serve life without parole. The first execution in Missouri following the US Supreme Court decision authorizing the legality of capital punishment statutes took place in 1989, although the new capital punishment law became effective in Missouri on May 26, 1977. From June 30, 1991 to June 30, 2014 there have been 73 executions.

The statistics count offenders on the first admission by the Department of Corrections for a conviction of Murder 1st degree for an offense committed after October 1984 or a conviction for capital murder prior to October 1984. Prior to October 1984, Murder 1st degree allowed parole. Re-sentencing and commutation of the death penalty are not included in the charts.

Supervision Assessment (Offender Needs Score)

During the first ninety days of supervision, the offender is in the assessment period. At the end of that period, the supervision level is based on the field risk reduction instrument completed by the probation and parole officers. This assessment is based on the offenders' prior history and current interaction with the community.

The Need Score is a risk and needs assessment completed by the supervising probation and parole officer. For offenders on regular supervision it is updated every 60 days. The assessment determines the level of supervision and the need for community programming and supervision strategies. The scoring of the components of the last needs assessment on or before June 30, 2014 is shown after the level of supervision. Offenders in the community release centers are not included in the Needs assessment.

Other	6.3%	0.5%

Supervision openings have increased 0.6% per year in the last five years compared to a 1.0% increase from FY2005 to FY2009. What is of significance to the department, because of the impact upon supervision caseload, is the decrease in paroled offenders of (1.4%) per year. Senate Bill 5 enacted in 2003 removed non-violent misdemeanor cases from DOC probation supervision, and this has been the main reason for the decline in new court probations.
